

Trackstar Stolen Vehicle Tracking - NEW PRODUCT

TRACKSTAR ADVANCE

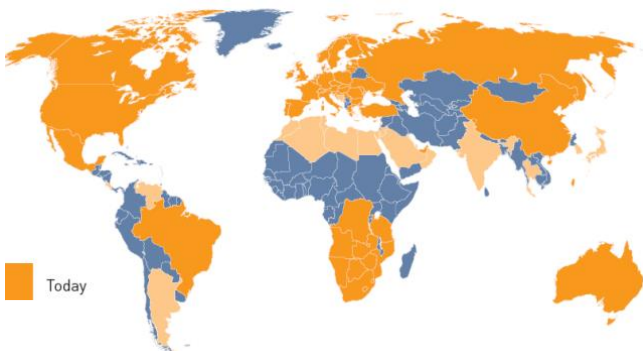

CAT6 Stolen Vehicle Tracking with sophisticated driver identification technology providing enhanced vehicle security inhibiting unauthorised vehicle start.

The growing trend in vehicle theft is towards electronic intervention, known as 'key cloning'. This now accounts for over 50% of all car theft cases.

In conjunction with the Thatcham Motor Research Centre and Trafficmaster OEM partners, Trackstar has developed an innovative new telematics device that enhances the vehicle's existing security system.

TRACKSTAR ADVANCE, a certified Thatcham CAT6 product, unlike any other offering, is armed with additional features and enhancements to combat electronic based theft.

Incorporating theft prevention technology in addition to existing SVT capabilities, the Trackstar system uses proven Trackstar CAT6 hardware & the global service provider Eurowatch.

OPERATION

The Trackstar Advance system utilises a driver identification system. All systems are supplied with two tags as standard. When the ignition is switched on an audible single beep is heard, which confirms the tag is present and the system will allow the vehicle to start. If no tag is detected, no beep will be heard and the vehicle will not start.

If a tag should be lost, damaged or out of power an emergency override is available.

It is essential that the tags remain on the key ring at all times. The tag(s) should not be left in the vehicle or kept separately from the keys.

For keyless vehicle the fob and tag should be on the drivers person or in the centre console area to ensure efficient operation of the system.

Subscriptions	Prices
1 year	£168 inc. vat
3 year	£450 inc. vat

Trackstar Stolen Vehicle Tracking

TRACKSTAR deploys the latest GPS Stolen Vehicle Tracking technology to locate and track your vehicle, liaising with the Police to recover your vehicle in the shortest possible time.

Once activated, the location of a stolen vehicle is pinpointed every 20 seconds. If your vehicle is moved illegally we locate it using the Global Positioning System (GPS) in your vehicle Trackstar tracking unit. If your vehicle is moved without the use of its keys outside of its geofence, the unit will notify us and we will contact you immediately.

Trackstar is the only **Jaguar, Land Rover, Range Rover and BMW** approved Stolen Vehicle Tracking & Recovery product, and is approved for installation throughout the UK automotive industry.
